Project Design Phase-I
Solution Architecture

Date	19 October 2022
Team ID	PNT2022TMID24293
Project Name	Fertilizers Recommendation System For Disease Prediction
Maximum Marks	4 Marks

SOLUTION ARCHITECTURE:

Solution architecture is having different sub-processes that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behaviour, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
